

PRO AUDIO QC, MASTERING-GRADE

RTMcompare

Pro mastering tools, minus the wall of jargon.

AVAILABLE FOR MACOS · APPLE SILICON

THE PROBLEM

*Mastering software has spent
a decade adding more knobs.*

*You still need three apps
to ship one record.*

*And nothing connects the room
to the delivery email.*

WHAT WE BUILT

One desktop app for the whole pre-release run.

Local-first. No cloud round-trip. Built by an engineer, for engineers.

OVERALL VERDICT

-7.1

LUFS

Two point eight louder than the reference, integrated.

A/B COMPARE

Level-matched. Every difference, named.

A · REFERENCE

-9.9

B is 2.8 LU louder than A, integrated.

ref.wav

B · MIX

-7.1

mix.wav

SINGLE-FILE QC

Drop one file. The whole service appointment.

Clicks and glitches plotted on a clickable timeline.
Distortion (clipping, inter-sample, harmonic) named with the band it lives in. Mains hum at 50/60 Hz plus harmonics. Limiter artefacts (pumping, IM, stuck-fast).
Generation loss — MP3/AAC fingerprints inside what someone called "the original."

DOLBY ATMOS

ADM BWF native. Preflight gates delivery.

Bed and objects, parsed. Binaural TP, metered. Stereo downmix, QC'd. Apple's hard checks (objects $\leq$ 118, LFE routed, bed layout, 48 kHz, $\leq$ 24-bit) gate the export — fail any of them and you fix it before you send. Per-object anomaly detection flags hot, silent, static, or dark objects. Usually a mix mistake.

COMPANION APPS

RTMprofile

Feed it 5+ finished masters. It learns your sound,
saves it as a fingerprint, drops straight into
RTMcompare's Match tab. Your catalogue, made portable.

RTMsend

VST3 / AU plugin. One button from Wavelab, Logic,
Pro Tools, Studio One — straight into RTMcompare.
ARA-aware where the host supports it.

PRIVACY

No audio leaves the machine.

Every analysis, every render, every metadata read — all on this device. The only network path the app opens is opt-in DSP delivery status: outbound only, read-only, with credentials kept in the macOS Keychain via safeStorage. That's the entire list.

RTMcompare

Pro mastering tools, minus the wall of jargon.
